BabySEC Regulation

Restoring Investors Trust in the Cyber Decentralized Space. “The only reason a lot of people got scammed is because of lack in crypto education.” -BabySEC

The first and best baby regulator series of crypto is here! **\$BBSEC** is a unique in name, and not from the doge meme series or any other crypto name copy but an original concept idea about regulation and crypto combined to clean the defi space. Watch out Babies!

Start of BabySEC

When I preached Bitcoin back then people called it a scam, a bogus, nothing more than a tulip bubble. They don't believe in it at all! People call it the internet money of the dark web but I never stop there. I saw a lot of scams and rug projects I think it is time.

BabySEC aims to provide and tackle the problem of Crypto Space by assembling a decentralized community of anonymous individuals and volunteers in the CyberSEC Community in a bold attempt to return the investors trust back in to Decentralization.

Trust is the most important in a decentralized trustless system that's why we need to emphasize the idea of Education first and Earn later on. To give them Knowledge that can let them earn at the same time is way cooler than the ocean of promises without compromise.

No one should be a victim of scams!
BabySEC solved that problem!

The baby symbolism is us “people” that aspired for a brighter future.

Eagle is an order that will help us establish that foundation of trust. BabySEC is a Cyber Security Movement with Defi + NFT utility use-case.

FORUM

We have a dedicated forum for investors, crypto educating newbies, and dedicated BabySEC discussion.

RANKS

1. Shitcoin Regulator

A group of babySEC expert with Law wielding the power of Security and Exchange Community effect to build a new Decentralized accepted Regulation for the Shitcoin World!

The world is full of mystery every pattern is connected to some source. Information is asset, a lot of people got rugged. We should build a new kind of rules in the decentralized cyber space. The Shitcoin Regulator is here!

Rugbuster.

High yield profit will surely lure anyone an easy target for exploiters and rug lords. The mission of Regulator is to build a law where people can be aware to easily detect and avoid scam projects.

1. Crypto Educator

The group that educate the mass about crypto and scams. Openly for everyone while they earn the right way.

Crypto Educator are HODLers of \$BBSEC who are also keen to the crypto basics and fundamental empowering our goal in reaching for more potential hodlers aka believers of the vision in cleaning the crypto. Crypto Education is a must!

Education

A system in which we can educate the mass while they earn the right way. In able for us to mass adopt blockchain we need to clean the crypto space first.

BabySEC is a defiance-crypto type and not just a meme that will be focused on defi-education and defiregulator. The token itself incentivise the idea of anti crypto rugs to let our educator earn while educating the mass. Earning the cool way is better than join any HYIP ponzi out there.

Our volunteered educator will earn while cleaning the crypto space about scams while pushing the blockchain World initiative.

Transfer of wealth is better than a pyramid and the scam word should be not be on our radar anymore.

BABYSEC REGULATION EDUCATION ECOSYSTEM DEFI ECOSYSTEM

Education System BabySEC School

The idea about preaching crypto education the right way via our community forum and BabySEC crypto school.

BabySEC Audit

An Audit Service to verify projects if it is rug or not. The most trusted security engineers joining the project soon will make this happen.

A BabySEC Seal that will be marked to every project we audited as a proof of Legitimacy diminishing rugs and legit.

BabySEC Regulation

This is the Finale of the project Educatio Ecosystem to build a decentralized Regulation for the Decentralized Cyber Crypto Space.

OUR MISSION

By providing a powerful tokenomics to lure the crowd in this project we can finally get the attention of people while teaching them the right way in earning with cryptocurrency.

We the crypto enthsuiast can provide useful informations through our forum discussion, biogs, and more regarding the crypto space adventure to everyone.

The Mission is to clean the crypto space while providing some accurate information to every investors in the decentralized world of crypto.

DeFi Ecosystem

A sneak peek to its Defi NFT Game version. Team Devs might integrate this idea into the Defi Ecosystem of BabySEC to build an educational crypto NFT Game allowing the educators and student to teach, learn, and earn.

Educators will teach and earn.
Learners will learn and earn.

Rewards

BabySEC provides reward in BUSD to reward the HODLers of BBSEC token. By doing this we can ensure avoid an impermanent loss seen in every copies of buyback and auto rewards projects.

The automatic liquidity pool will be the auto handler of BabySEC replenishing the liquidity of the token on every transaction.

The contract will collect tokens from each transactions adding them to the Liquidity Pool to sustain the max circulating supply of BBSEC.

HODLers will be rewarded by BUSD in the first 7 days which was collected by the SEC Effect Wallet. The snapshot will be taken in the first 7 days to see who HODLS and who doesn't.

15% Total Tax on every Transactions.

Liquidity is locked till 2100:

Roadmap

CHARITY AND UTILITY

We know how people think of this issue too so we are here to explain that.

We want to help the people by guiding them with crypto education and use the token as utility for services exchange offered by the whole Ecosystem.

MANIFESTO

Rug pull projects are rampant these days and that is why we're here to put an end to it at last.

We got rug pulled too l,y those really bad players in the crypto space so it is time!

Restoring Investors Trust in the Cyber Decentralized Space by protecting teh People!

#BaBySEC will take on the shit World for Cleansing Crypto Space!

We are \$BBSEC! Expect Us! To the Moon!

This is not an investment scheme but a use-case with a reward system to incentivize an idea cleansing the crypto space while supporting the movement.

F.A.Q

Q. Why volunteer and anon devs?

A. We are dealing with cyber security to push an antirug activity while protecting the volunteers and anonymous devs too. You must understand that.

DISCLAIMER

This token is not for ownership but a utility for its Ecosystem.

The reason for a presale is to avoid all ape bots from sniping the liquidity first in which most fairlaunch had trouble with.

We should avoid that to not let those nasty bots destroy such ambitious project.
